**ReimbursementPLUS and EMRlogic lead integrated coding initiative for eye care profession**

... leverage critical CPT information and reimbursement data to create fully integrated solution

**Las Vegas, NV (September 5, 2012)** – Industry leaders [EMRlogic Systems](#) and [ReimbursementPLUS](#) today announced the release of a fully integrated solution offering real-time CPT information and reimbursement data, incorporated within [activEHR](#). The cooperative agreement offers EMRlogic's activEHR customers real-time access to critical information, necessary for providing the best, most efficient and effective patient care.

"Our essential goal with activEHR is to provide the eye care profession's best, most intuitive electronic health record, one that first meets the needs of doctors to see more patients, improve care and lower costs then also exceeds the requirements of connected care and health care reform," said Glenn Brand, CEO at EMRlogic. "The future of health care is really all about changing the way doctors use computers, thus our commitment to creating an easy-to-use yet powerful and forward-looking solution, one that takes advantage of innovations provided by key industry partners like ReimbursementPLUS. We're very proud to be leading the charge to connected care for the eye care profession."

"The ReimbursementPLUS cloud-based system now connected within EMRlogic's web-enabled activEHR displays critical CPT data and information that applies to the practice," said Dr. John Rumpakis, architect and developer of ReimbursementPLUS. "This is information that's critical for doctors when making important business and clinical decisions throughout the day. Now, from within the exam, we can offer the most comprehensive compilation of CPT data available. Having that information in real time is more and more not only essential for business, but also critical in keeping the doctor and practice safe in preventing audit situations. Like EMRlogic, we are also very proud of this industry-leading innovation and happy to be working together. "

**About EMRlogic Systems**

EMRlogic is a privately-held company based in Greater Vancouver, Canada and dedicated to Eye Care Professionals. EMRlogic is an application partner for InterSystems Corporation, Cambridge, MA. EMRlogic offers comprehensive and fully-integrated Optometry and Ophthalmology software solutions. For more information, please visit [www.emrlogic.com](http://www.emrlogic.com).
